## Profile

Flutter Developer with 6+ years of experience building and deploying cross-platform applications. Currently sole developer of a customer-facing tour booking platform across Web, Android, and iOS. Combines deep technical expertise in adaptive layouts, theming systems, and CI/CD with experience in technical writing and engineering hiring.

## Work Experience

### Mobile Developer

09/2022 – Present

Upiria 

Flutter, GitLab CI, Fastlane, Stripe, Firebase, i18n, Navigator 2.0

- Sole Flutter developer of a customer-facing tour booking app for **3 years**, deployed across **Web (adaptive), Android, and iOS** platforms
- Translated complex Figma designs into **adaptive Flutter UIs** with precise consistency
- Built custom **Navigator 2.0** implementation enabling **web deep linking** and **browser URL sync**
- Added **multi-language support** with browser/device-based locale detection and localized currency formatting
- Implemented Continuous Integration/Continuous Deployment (**CI/CD**) pipelines using GitLab CI and Fastlane, reducing deployment time by 40%
- Integrated **Stripe payment, Maps and Firebase Auth**
- Proactively upgraded Flutter/Dart to latest versions, unlocking modern language features and framework improvements like **WASM** support for lightweight web performance
- Authored visual **technical documentation** for complex features and maintained comprehensive README, accelerating team onboarding and development workflow

### Flutter Developer and Technical Writer

10/2018 – Present

Flutter, Android (Java + Kotlin), In-app payments, Web-sockets

- Led technical interviews and made hiring decisions for client development teams at CodeKernel Solutions
- Developed and delivered stable, performant mobile applications for clients including FoodDocs (food safety compliance), Tradly (API-first marketplace builder), RefHQ (quiz app for sports referees), and Dwarkesh Estate (real estate portal)
- Created technical documentation for FlyyX Technologies which removed their need for developer onboarding support

### Flutter Developer

03/2021 – 10/2021

BSP Technologies 

Flavors, Material Theming

- **Conducted technical interviews** and developed a performance tracking system for candidate evaluation
- Pitched and implemented **flavors**, reducing publishing time by 30 minutes per flavor
- Delivered Dark Theme support and established a reusable and future-proof **Material Design theming system** within 5 days

## **Skills**

---

**Mobile Development** — Flutter (Web, Android, iOS), i18n/l10n, Adaptive Layouts, Android Framework (Kotlin)

**Backend & Cloud** — Firebase (Auth, Analytics, Realtime DB, Firestore, FCM)

**DevOps & Tools** — Git, GitLab CI, Fastlane, CI/CD Pipelines, App Store Deployment, Flutter DevTools

**Architecture** — State Management using Inherited Widgets and Riverpod, Navigator 2.0, Material Theming, App Flavors

## **Projects & Open Source**

---

**RefHQ** [↗](#) 2023

*Quiz App for Basketball Referees*

- In-App Subscriptions (Android & iOS)
- Firebase Realtime Database backend and Firebase Auth

**Dwarkesh Estate** [↗](#) 2019 – 2022

*Real Estate Portal System*

- Customer App: 4.6 star rating, 75+ daily users, 99.75% crash-free, 45% Week 1 retention
- Business App: Manages 80+ data points with smart field display logic
- Push notifications, deep linking, and employee assignment tracking

**Five Star Me** [↗](#) 09/2020

*Open Source Android Library*

- Above 2k monthly downloads on jitpack in 2022.

## **Education**

---

**B.Com** 2010

*Saurashtra University*

**CA Intermediate** 2010

*ICAI*
